Environmental Hazards

This pesticide is toxic to fish and aquatic invertebrates and may adversely affect non-target plants. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Sweeping any product that lands on a driveway, sidewalk, or street, back onto the treated area of the [lawn or garden] will help to prevent run off to water bodies or drainage systems.

This chemical has properties and characteristics associated with chemicals detected in groundwater. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination. Application around a cistern or well may result in contamination of drinking water or groundwater.

Trimec® controls a wide range of lawn weeds, including dandelion, chickweed, plantain, henbit, spurge and many other listed weeds commonly found in home lawns. In addition, a xx-xx-xx fertilizer provides a supply of lawn food. Possible retreatment may be necessary if (a) the lawn is heavily overrun by weeds or, (b) if adverse low moisture conditions prevail and weeds are in a state of poor growth. A second application may be made after 30 days. Treated areas may be seeded 3 weeks after application.

USE PRECAUTIONS:

Do not use on dichondra, carpetgrass, 'Floratam' St. Augustinegrass, creeping bentgrass, or turfgrass where desirable clovers are present.

Do not apply this product to newly seeded grasses until well-established or after the second or third mowing.

Do not use this product on flowers, vegetables, groundcovers, gardens or landscape plantings including shrubs and trees. Do not exceed specified dosage for any area and do not apply this product within the dripline of or over surface roots of trees, shrubs, and other ornamentals.

Reseeding or overseeding areas may occur three (3) weeks after the application of this product.

Do not use this product on or near desirable plants and avoid spreading granules onto exposed root systems or adventitious shoots (rhizomes) within the drip line of the roots of desirable trees and shrubs, since injury may result.

Do not apply directly to or near water, storm drains, gutters, sewers, or drainage ditches. Do not apply within 25 feet of rivers, fish ponds, lakes, streams, reservoirs, marshes, estuaries, bays, and oceans. Do not apply when windy. Apply this product directly to your lawn, and sweep any product landing on the driveway, sidewalk, gutter, or street back onto the treated area. To prevent product run-off, do not over water the treated area(s) to the point of runoff or apply when raining or when rain is expected that day.

HOW MUCH TO APPLY:

[Option 1a]

TURF Fertilizer Plus Trimec Ester Weed Control can be applied to the following turfgrasses when applied as directed:

Kentucky bluegrass, fescue spp., perennial ryegrass, common bermudagrass, bahiagrass, and zoysiagrass[.] : Apply 2.5 to 4.0 pounds [xx.x pounds] of product per 1,000 square feet of established turfgrass.]

For St. Augustinegrass (not 'Floritam'), centipedegrass, hybrid bermudagrass, and colonial bentgrass[.] : Apply 2.0 to 3.0 pounds [xx.x pounds] of product per 1,000 square feet of established turfgrass.]

[Option 1b—specifically for 14 lb and 42 lb bags]

[For use on: Kentucky bluegrass, fescue spp., perennial ryegrass, common bermudagrass, bahiagrass, zoysiagrass, St. Augustinegrass, centipedegrass, hybrid bermudagrass, and colonial bentgrass.] Apply 2.8 pounds of product per 1,000 square feet of turfgrass. A second application may be made after 30 days. The maximum number of broadcast applications per treatment site is 2 per year.

[Option 1c—specifically for 13lb and 39 lb bags]

[For use on: Kentucky bluegrass, fescue spp., perennial ryegrass, common bermudagrass, bahiagrass, zoysiagrass, St. Augustinegrass, centipedegrass, hybrid bermudagrass, and colonial bentgrass.] Apply 2.6 pounds of product per 1,000 square feet of turfgrass. A second application may be made after 30 days. The maximum number of broadcast applications per treatment site is 2 per year.

Maximum use rate statement

Do not apply more than [Use rate xx.x pounds or 4 pounds [maximum]] of product per 1000 square feet of turfgrass per application. If necessary, a second application may be made no sooner than 30 days after the first. Do not apply more than [2x use rate xx.x pounds or 8 pounds [maximum]] of product per 1000 square feet per year. [note to reviewer: the following information may be omitted from the final printed label: 4 pounds of this product contains 1.28 lb 2,4-D (ae), 0.29 lb mecoprop-p (ae), and 0.12 lb dicamba (ae).]

[Alternate maximum use rate statement

The maximum broadcast application rate is 4.0 pounds of product per 1,000 sq. ft. per application (1.28 lb 2,4-D ae, 0.29 lb MCP-P ae and 0.12 dicamba ae per acre per application). Optional [Application Equipment and Instructions] [Spreader Directions]:

[Determining Your Lawn's Square Footage]

[To determine how much of this product to apply, you must determine the square footage of your lawn. An easy way to do this is to walk the length of your lawn, figuring that one pace equals about 3 feet. Do the same with the width of the lawn. Then multiply the length by the width to arrive at the total. Make sure you subtract the square footage of your home and driveway when calculating the total square footage of your lawn. If your lawn has an irregular shape, try dividing it up into a number of square areas. Calculate the square footage for each area, then add the figures together to reach your total lawn size.]

[Insert icon representing foot print of house, driveway and lawn]

[above pictogram is optional]

[Spreader Tips]

[The two main types of spreaders are the Drop Spreader, which drops the material straight down the width of the spreader as you push, and the Broadcast Spreader (also known as a rotary), which throws the material from the spreader.]

Broadcast Spreader	Delivers ___ lbs./1,000 sq. ft.				
	2.0 lb	2.5 lb	2.8 lb	3.0 lb	3.5 lb
XXXX	X	X	X	X	X
	X	X	X	X	X
	X	X	X	X	X

[These settings were calibrated and field tested. However, age and condition of spreader, speed of operation, and evenness of terrain may require slightly different settings for desired coverage.]
